Subject: FORD P758 MCA T/HSG

Quotation

1. EFD deviations to WIA's RFQ of retooling for FORD P758 MCA T/HSG

No.	RFQ Description	EFD comment
1.1	Warranty 1 year after FAC	No warranty as the jigs, clamps and coils to be supplied are consumable parts
1.2	Tooling detailed drawing	Exclude coil detailed drawings Only coil assembly drawing will be provided

2. Items & Prices

No.	Item Description	Qty.	Unit price	Amount
1	Clamps	1 SET	2,000	2,000
2	Stem hardening coil for 21027-P7711	2 EA	7,000	14,000
3	Stem hardening coil for 21027-P7713	2 EA	7,000	14,000
4	Inner spline hardening coil by scanning for 21127-P7701N	2 EA	9,500	19,000
5	Bell hardening coil	2 EA	7,500	15,000
6	Coil round-trip transportations between WIA Mexico and EFD China regarding the bell hardening coil modifications Note: bell hardening coil can't be tested in EFD China before delivery as there is no lab resource	1	1,000	1,000
7	Process developments and machine running tests for 21027-P7711, 21027-P7713 and 21127-P7701N by EFD Mexican eng'r in WIA Mexico for 2 weeks 'at once' not separate	1	50,000	50,000
8	Bell eddy coils made by ibg	2 EA	5,500	11,000
9	Packing and transportation of test pieces - 15 test pieces each type shall be provided by WIA for free and "ready for	1	3,500	3,500

Update: 2023-02-14

To Hyundai WIA

From EFD Induction (Shanghai) Co., Ltd.

	pick-up" shall be announced to EFD no later than the 3 rd week from the order date. - Pick-up, packing and transportation from Korea to China are in the responsibility scope of EFD. - These test pieces (whatever heated or not, cut or not) can be scraped by EFD after coil testing done.			
TOTAL PRICE (USD), FOB Shanghai				129,500
The final discounted price (USD), FOB Shanghai				123,000

***the 1st comment:**

There're lab resources in EFD China to test stem hardening coil and inner spline hardening coil before delivery, so 15 pieces each type shall get to EFD China in 4 weeks from the order date for the purpose of testing coils.

***the 2nd comment:**

Each spare hardening coil will be made by EFD China after each first hardening coil has been proved out in WIA Mexico.

Estimated lifetime of a bell hardening coil: 50000 heating times

Estimated lifetime of a stem hardening coil or an inner spline hardening coil: 20,000 heating times

***the 3rd comment:**

WIA's experience with hardening frequency for inner spline is 10kHz and heating method is scanning. EFD don't have such experiences so testing will be first.

3. Lead time:

the goods above will be ready for shipment in 16 weeks after receiving a PO from the buyer

4. Terms of payment:

full payment in 15 days from the order date (without being reached on time, the lead time will be subject to extend accordingly)

or the buyer shall open an Irrevocable Letter of Credit in favor of the seller for 100% order value in 15 days from the order date (without being reached on time, the lead time will be subject to extend accordingly). The L/C shall remain valid for 6 months and shall be paid fully right after receipt of shipping documents and a performance bond issued by the seller's bank for 10% of the order value which shall be valid in 3 months from the shipping date.

5. Tax statement: all the prices above exclude any tax and customs duty.
