가격 정리표 (멕시코 GE B1 리틀링 프로젝트)

Date : 2023.02.08

1. 견적가격 (Quotation price) - Offer No. : 203391/2

- O/R Soft milling : 40,800 €
- O/R Hard milling : 32,800€

■ Total : 73,600 Euro (2 sets)

2. **최종 가격 (Final Price):**

- O/R Soft milling : 36,700Euro (-10%)
- O/R Hard milling : 29,300Euro (-10%)
- Total : 66,000 Euro Euro(2 sets)

3. Delivery : 2023 년 05 월 20 일

4. Payment Condition :

FOB : 85% of order amount (By irrevocable L/C)

FAC : 15% of order amount (By T/T)

상기 견적 범위는 부품의 제작 설계가 아닌 리틀링을 위한 장비 셋업 및 Trial 이므로
장비에 대한 보증은 필요 없다고 생각합니다. (w/bond 제출 불요)

에막 코리아 부장 구도연 드림.

1 RETOOLING VSC 315 TWIN KBS - SN 108818 - soft machining

Machine Data:

Machine: VSC 315 TWIN KBS - Outer Race machine
Serial Number: 108818
Project- Number: P-30112295.01
Year of construction: 2015
Controller: Siemens 840 Dsl - Operate
PCU 50.5-C / NCU 720.3
OP012
machine operation: soft machining

Task:

- Tooling layout for one workpiece
- M/C set up at customer site by [EMAG Mexico](#)
- Production support after SOP by [EMAG Mexico](#) (5days)

According to the current drawing situation, the existing workpiece carriers (P758) can be used - with regard to milling tools, we noticed a deviating chamfer in the internal geometry. Here, the customer must decide how he wants to handle this .

Available drawings:

- G21026P7001N0F.dwg
- 21026_ST000E_BJ_ORACE_CUP_V22C0055_Sheet_1.dwg
- 21026-GE003_FORD_GE2_B1_V22C0067_220725_Sheet_1.dwg
- 21026-GE003_FORD_GE2_BJ26 OUTER RACE.stp

All hardware components are provided by the customer.

Quality:

Due to the age of the machine and the natural wear and tear that occurs as a result, no advance guarantees can be given regarding the quality of workpieces that will be produced.

Therefore we cannot guarantee for quality and won't do any confirmation for acceptance or capability

If the machine does not pass the MCT due to wear and tear to components and assemblies, a quotation for replacement and installation of new parts will be provided separately.

Cycle time:

The system cycle time depends on the workpiece geometry and is determined after retrofitting the system on site.

please note:

For programming of operation masks the following drawings are absolutely needed:

- drawing of the workpiece in the status it enters the EMAG machine
- drawing of the workpiece in the status it has to leave the EMAG machine

If these information are not available at placement of PO the delivery date will extend accordingly.

2.1.8

1 QUOTATION GUIDELINES

Additional services over and above those contained in the quotation will be carried out by agreement and charged at applicable EMAG hourly rates with proof of work provided.

If during repair, retrofitting, adjustment or start-up, parts which are not included in our quotation are found to have more than the normal degree of wear and tear, impairing the proper functioning of the machine, these parts will be quoted for and installed if the customer accepts. This may result in a price and completion date different from those specified in the quotation.

EMAG accepts no liability for parts not included in the quotation which must be removed and remounted during repair, retrofitting, adjustment or start-up.

We have based our quotation on the assumption that the machine is in as-delivered condition.

If any structural changes have been made to the machine, they must be examined by Design. The additional costs incurred as a result will be calculated and billed separately.

The client must ensure that the following conditions are met before assembly work can proceed: The machine(s) must be in a functional, complete and clean condition on the day installation work begins. This installation site must be accessible. Waiting time resulting from a failure to meet these requirements will be billed separately.

WITH PROCESS/MCT

Due to the age of the machine and the natural wear and tear that occurs as a result, no advance guarantees can be given regarding the quality of workpieces that will be produced.

If the machine does not pass the MCT due to wear and tear to components and assemblies, a quotation for replacement and installation of new parts will be provided separately.

In preparation for setup or acceptance, the client must provide sufficient raw parts for test purposes as well as measurement programs for the workpieces and ensure that there is capacity in the measuring room.

Waiting time resulting from a failure to meet these requirements will be billed separately.

Sum of the partial quotation: 32.800,00 €

Total: 73.600,00 €

Commercial Conditions

CONFIDENTIALITY

Any commercial and operational written or oral information or data relating to this quotation / order, such as drawings, specifications, recommended machining data and clamping methods, etc., shall not be divulged to any third party (referring, in particular, but not exclusively, to competitors, for the purpose of bid comparisons) and are to be used solely within the meaning of this quotation / order.

The recipient of this quotation / order expressly accepts these obligations.

MACHINING

The determined cycle times result from values, which are based on data and experiences of acknowledged cutting material manufacturers. Changing rough part dimensions, tolerances, material as well as the material hardness are only possible during building and testing of the machine. Changes will only be accepted in written form and in mutual agreement.

PROVISION OF EQUIPMENT AND MATERIALS BY CUSTOMER

All tooling, work holding equipment, parts, etc. are to be supplied with DDP supplying plant EMAG Incoterms 2020. We wish to point out that we accept no responsibility for the functional capability and working order of any equipment provided.

The functional capability of the provided equipment is the responsibility of the buyer.

In the event of problems, we assure you of our constructive collaboration. Any additional costs arising from modification, optimization, etc. will be charged to the customer. Furthermore, we do not guarantee any quoted machining times in such cases.

When orders cannot be carried out on schedule, caused by material supplied by the customer or if technical problems should occur, the machine will be invoiced on the originally agreed delivery date, when the relevant payment will become due.

The agreed upon date of delivery date may be postponed to the time to achieve full operability, which shall not result in any event of default of the manufacturer.

DELIVERY PERIOD

By appointment and verification of staff availability.

The delivery period is not binding and can change between the submission of quotation and placement of order.

Please discuss the subject of delivery with us at time of order placement and we will do everything possible to meet your requirements. Changes regarding the component/s or the machines or the order content after order placement may result in changes in price and delivery.

Compliance of delivery date requires timely down and / or partial payment by the customer within the prescribed payment terms. If receipt of down and or partial payment is delayed, the delivery shall be postponed accordingly, which shall not result in any event of default of the manufacturer.

DELIVERY BOTTLENECKS

If we are unable to meet delivery dates (non-availability of the service) for reasons for which we are not responsible (particular "Force Majeure"), we reserve the right to postpone the delivery date to a point in time at which the service is possible for us again. This applies for a maximum period of twelve months beyond the agreed delivery time. If the unavailability of the service will not end foreseeably, we reserve the right to withdraw from the contract in whole or in part. A case of non-availability of the service also applies in particular to non-delivery by our suppliers (e.g. disrupted supply chains worldwide), unless EMAG is responsible for this circumstance through intentional or grossly negligent behavior.

We assure you of our endeavor to serve every order in a timely manner.

PRICES

FCA (Free Carrier, Incoterms 2020). Packing, insurance and transport not included.

The payments are to be made without deduction. With delayed payment the relevant laws apply.

VALIDITY OF PRICES

The prices quoted are valid for 60 days from the date of quotation. Orders placed after this period would be subject to a price increase of 1 % per month to cover increases in labour and material costs.
This quotation will replace all previous versions.

PAYMENT TERMS

30 % down payment at order confirmation,
70 % at delivery
All payments are due immediately without deductions.

RETENTION OF TITLE

The machine will remain the property of the builder until complete payment is received from the buyer. Upon placement of order the extended retention of title according to clause 48 of our General Conditions for Sales and Deliveries shall be deemed as agreed.

LIMITATION OF LIABILITY

Liability of the contractor, for whatever legal reason, is excluded. This does not apply in cases of intent or gross negligence, in cases of injury to body, life or health, as well as in cases of product liability or liability from other mandatory statutory provisions.

PERIOD OF LIABILITY

Any rights and claims of the buyer caused on defects shall be subject to a limitation period of twelve months.
The limitation period starts with the final acceptance, but no later than 3 months from delivery, and does not apply to wear and tear parts.

WORK PIECES FOR MACHINE ACCEPTANCE

Both, pre-acceptance and final acceptance tests are carried out with either an EMAG test component to VDI standard, or the work piece specified by the customer's order.
The customer will supply an agreed number of work pieces for machining process optimisation and pre-acceptance tests. These work pieces must be from a single batch and of a quality that corresponds with the relevant manufacturing drawing. For preparatory work and preliminary machine acceptance the customer will, at the agreed time, supply EMAG free of charge with a sufficient number of sample work pieces of a quality that corresponds with the relevant manufacturing drawing. Any delay in the supply of these work pieces will result in the machine delivery being delayed and the starting date of a possible delayed machine delivery penalty being deferred accordingly.

FINAL ACCEPTANCE AND FINAL PAYMENT

Final acceptance tests are carried out as soon as the machine has been installed and commissioned.
For this purpose, the buyer has to provide a sufficient number of work pieces, personnel and capacity to measure and evaluate the acceptance components.
Once the machine is taken into production and the agreed component quality and cycle time have been achieved, final acceptance is considered to have taken place.
Where final acceptance of the machine is not possible owing to reasons beyond EMAG's control (missing acceptance components, etc.), final contractual payment falls due immediately.

TECHNICAL DEVELOPMENT

In the interest of technical progress, we reserve ourselves the right to make design changes which are due to continuous product development.

RESERVATION CLAUSE

For offers within the European Union (without Germany):

„Notification of Intra-Community delivery according to Art. 22 (10) EC Dual-Use Regulation:

The following purchased goods are subject to export controls. For the export of these goods from the Community an export license is necessary.”

For offers outside the European Union:

It is agreed, that the legally binding conclusion of this offer is subject to the suspensive condition that the competent authority grant the necessary export license.

ADDITIONAL PROVISIONS

In addition and subordinated to this quotation our General Conditions for Sales and Deliveries for International Business shall apply.
